Vacancy announcement

Wireline Technician

Our client, a multinational company, specialized in oil and gas, is looking for a “Wireline Technician” to accompany his activities in Cameroon

Work location	Douala, Cameroon
Work Schedule	21/21
Department	Operations
Reports to	Well Services
Year	2022
Headcount	1

Job Purpose/Summary

The Wireline Technician provides professional and effective support to assist on Wireline operations in the entire field activities on site as well as the maintenance of related equipment. S/he supports the selection, loading and unloading of required tools and corresponding surface instrumentation for Wireline jobs.

Key Accountabilities/Result Area

- Responsible for following shift HSE procedures and documentation on site.
- Performs all required duties and responsibilities safely and as described by Managing Base Operations, Managing Wellsite Operations and Managing Equipment and Logistics Manuals
- Routine maintenance of wireline equipment at jobsite and assembling tools
- Performing safe operation of crane and rigging of loads.
- Performing pre-job preparation of wireline equipment, wireline units, survey jobs and ensuring completion of pre-job logistics
- Removing and disassembling tools and equipment in the field
- Carry out post-job shop responsibilities, including cleaning, servicing equipment, office equipment testing, and accurate and timely submission paperwork and related files
- Preparing and maintaining documentation for jobs, daily reporting, and all applicable administrative functions
- Responsible for accurate data gathering and reporting to Well Analyst.
- Responsible to carry out Wireline Supervisors instructions both on site and in the shop.
- Long shifts, regularly 12 hour shifts of work on site.

- Extended stays away from home in offshore locations.
- The job requires direct contact with the other crew members and as well as other operating personnel on location.
- Assist with regular inspection; inventory, and function and pressure testing are direct responsibility.
- Responsible for Training and Safety of junior staff on job site.
- Take reasonable care to prevent harm to themselves.
- Work in accordance with information and training provided.
- Report any hazardous defects in plant, equipment and workplace, or shortcomings in the existing controls, to a responsible person without delay. Not undertake any task for which authorization and / or PTW has not been given.

Interface & Dimensions

Internal interface

- Primary contact for this position is the Well Analyst.
- Secondly contact with Head of Offshore Operations and Offshore Installation manager.
- Contact with Area Operations for disciplinary, promotion, or other issues concerning the Area over all.

External Interface.

- Customer Representatives, Rig Staff, other Service Operators or Staff.
- Vendors specific to field operations

Key Challenges

- Critical decision-making skills and ability to react based on Job needs and Safe Work Practices. • Must follow orders well, possess good interpersonal skills and have willingness to work at close proximity with other employees
- Critical paperwork issues for Safety, Quality Assurance and Inventory Control.
- Dealing with difficult and varied personalities of crew and other site personnel.
- Requires good computer skills and good literacy.
- Must have very good organizational skills and be prepared for on call duties on a 24 Hr. basis
- Requires strenuous activities including walking, bending, climbing, and being able to lift a minimum of 50lbs

Experiences / Competence & Requirements

- High School diploma or equivalent. Extensive Oilfield Experience acceptable as an offset to minimal Education.
- Excellent mechanical aptitude and knowledge of pneumatics and instrumentation.
- Good computer skills and literacy
- Requires valid H2S, WHIMS, TDG, and preferably a First Aid Certificate
